TYPE 2 DIABETES

PREDIABETES

OBESITY

We Help You Manage These Conditions

DRUG - FREE

The Big Why ?

EVERY 10 SECONDS, SOMEONE LOSES A LIMB, A KIDNEY,
EYESIGHT, OR LIFE TO DIABETES.

NOT BECAUSE TREATMENTS DON'T EXIST...
BUT BECAUSE **CURRENT SYSTEMS REACT TOO LATE.**

- 1 in 3 adults are metabolic-risk positive.
- Over 40% of the population are prediabetic & most are unaware of it.
- Complication management cost **10X** more than early metabolic correction.

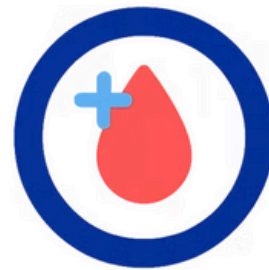

The global truth is simple:

We don't have a
treatment problem.

**We have a detection and
personalisation
problem!**

Results from our clients

90%

of our clients see 1.1%
Average HbA1c drop

95%

Of our clients see
notable reduction in
weight

93%

Of our clients have
successfully
reduced/eliminated
medicines/insulin

*Results shown here are based on reports from our clients on the flagship programme | TDL Vanguard

Global Telemedicine-Care

RE-ENGINEERING METABOLISM. REDEFINING HEALTHCARE.

November 10, 2025

Diabetes remission, metabolic restoration and cardiac protection—
delivered with scientific precision and human warmth.

Health rebalanced through the synergy of our **Metabolomist,

Clinical Evidence & Science.

1. BUILT ON PROVEN SCIENCE

- **Counterpoint, Counterbalance, DiRECT, and DIADEM-I** established that T2DM remission is physiologically achievable

2. OUR PROPRIETARY CLINICAL ENGINE

- a. **Preventera Remission Score**: Predicts remission potential using multi-parametric modelling.
- b. **Metabolic Twin** Prototype: Visualises organ-level metabolic state (beta).
- c. Clinician Dashboard: Integrates CGM, labs, phenotype markers, and clinical guidelines.

3. EARLY CLINICAL VALIDATION & PIPELINE

- 100+ patients across India & GCC in early pipeline.
- Positive early outcome signals: CGM variability, fasting glucose, weight trends, and adherence.
- Internal datasets informing algorithm refinement.

The global truth is simple:

We don't have a
treatment problem.

**We have a detection and
personalisation
problem!**

DOCTOR-LED PROGRAMME

Clinical Supervision Advantage

Expert oversight from:

- Metabolomist
- Endocrinologist
- Cardiologist
- Retina specialist
- Radiologist
- Psychologist
- Nutritionist

Ensures safety, credibility, and superior patient outcomes.

VISION

TO BUILD A FUTURE WHERE
TYPE 2 DIABETES IS

NO LONGER

A LIFE SENTENCE,

BUT A PREVENTABLE AND
MANAGEABLE CONDITION

ACCESSIBLE TO ALL.

MISSION

TO TURN REAL-TIME METABOLIC
DATA INTO ACTIONABLE
CLINICAL INTELLIGENCE —
ENABLING DOCTORS AND
INDIVIDUALS TO REVERSE
DIABETES SUSTAINABLY.
